## Experience

Contract Development, Trade Me inventory management, present

- Web based application using ASP.NET MVC.
- Integration with Trade Me API.
- Custom solution to manage Trade Me store. Keeps track of inventory, bank statements, dispatch orders, package labels, and more.
- Financial and inventory reporting using DevExpress XtraReports.

Software Developer, Concept Engineering Limited, 2006 – present

- Business desktop software using Delphi, Delphi Prism, and Crystal Reports.
- Developer of Advanced Manufacturing System, a business software for inventory management, finished goods production, forecasting, capacity planning, supply and demand analysis, and more.
- Developer of Advanced Business Manager, an international accounting package targeted at small to medium businesses.

- Built plenty of custom software and Crystal reports to integrate with above software.
- Knowledgeable in optimising SQL queries.
- Backend database is Microsoft SQL Server.

Director/Software Developer, Event Data Processing Limited, 2002 – present

- Developed online entries and results system for New Zealand and Australia athletics organisations.
- Particular attention was paid to providing a clear interface and good usability to end-users with a range of computer operating ability.
- Provided support for both clients and end-users.
- Continuous maintenance and development of individual clients' code bases.

Although the company was incorporated in 2004, development and continuous interaction with clients have been ongoing since 2002.

Developed e-commerce website for Mainland Fencing Limited, 2005

- Evaluated the online presence needs of Mainland Fencing.
- Designed and developed a website for users to browse and order fencing equipment.
- Includes an administration area for the owner to update products and manager customer orders.

## Interests

Enjoy hanging out with friends, watching movies, ripping skin off fingers from rock climbing, and creating hand-crafted objects.
