

RAD Studio XE5 in Action

Mobile Development Kickstart LIVE!

Kick Start your Mobile Development FREE at Embarcadero's live events in Christchurch & Auckland!

Come and join our Malcolm Groves, Damien Bootsma and your peers and get to grips with mobile development on iOS and Android.

Embarcadero are running interactive and practical workshops that will kickstart your mobile development. Malcolm and Damien will work with you to develop and deploy mobile applications to an Apple or Android mobile device. This one-of-a-kind workshop will include practical sessions where you will see a sample mobile app under development and in action, and take home with you the full source code and notes used in the session!

In this practical workshop, you will interactively learn:

- Creating and debugging your first mobile app
- Mobile UI design
- Accessing mobile platform services
- Mechanisms for accessing your data

Throughout the day there will be plenty of tips and tricks for developing for the mobile platform, and discussion on the possible application architectures that could be utilised to solve particular problems.

What you will take away:

- Invaluable new mobile developer knowledge
- First-hand experience of the full mobile development cycle
- Confidence that you are set up and ready to take on your App development challenges
- Full source codes and notes

Pre-requisites:

Developers familiar with RAD tools like Visual Studio, Visual Basic, Access or Delphi however there really is something for everyone, whether you are a developer (mobile or otherwise) or just interested in the latest in mobile development.

If you are an application developer, technologists or development team leaders and interested in extending your applications to mobile devices for your customers- you do not want to miss this workshop!

Live Workshops: Time: 8.30am – 5.00pm

Christchurch, Tuesday, 05 November, Pegasus Health

Auckland, Thursday, 07 November, Rydges Auckland
